SBR?3MK	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the distance of a player from basket for N shots. The index of array represents the position of the player. Score is calculated by	223/1
	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	,E005 385
3416005	Note:	2
341	* A subarray is a contiguous part of array.	38R23N
(	* Assume 1 based indexing.	5
SBRI	* The array contains both negative and positive values.	, O¢
2013	* Assume the player is standing on a cartesian plane.	23ME005
25	Input Format	-
BRIZMEC	- input1:An integer value N representing the number of shots made by the player	ab <sup>R</sup>
,6	- <b>input2</b> : An integer K representing the size of subarray	, £1005 3BP
60	- input3 : An array of integers
